

# Landscapers Advantage™

## Class A Compost

An organic soil conditioner for landscaping, tree farms, nurseries, gardens, sod farms, topsoil blending, land reclamation projects, parks, athletic fields, lawns, cemeteries, golf courses and more!

Landscapers Advantage Class A Compost is an organic humus that improves the physical structure of soils and supplies nutrients for plant growth. It is the product of aerobic biological decomposition of biosolids (municipal sewage sludge), yard waste and wood chips.

**Landscapers Advantage** meets EPA Exceptional Quality Class A standards. It meets these specifications:

pH	6.5-8.5
Total soluble salts	< 9 mmhos (approx. half nitrogen)
Moisture content	35-50 percent
Particle size	< 1/2" (> 85 percent will pass 1/4" screen)
Bulk density	900-1300 lb./cu. yd., (1150 lb./cu. yd. avg.)
Organic matter content	45-55
Total Nitrogen	2-4 percent
Total Phosphorous	1-2 percent
Total Potassium	0.3- 0.5 percent
Carbon to Nitrogen ratio	10-15 to 1

**Landscapers Advantage** is approved for unrestricted distribution and has a wide variety of uses. It contains various trace elements, which at various levels are necessary for plant growth. Quantitative data is available upon request. Application instruction sheets are provided to each purchaser.

**Recommended inclusion rates** to existing medium 10-30 percent, depending on existing medium and plant needs.

### Typical uses and application rates:

- Lawn Maintenance: Broadcast a half (0.5) pound of **Landscapers Advantage** per square foot of lawn.
- New Lawns & Flower Gardens: Till one (1) pound of **Landscapers Advantage** per square foot of lawn or flower bed.
- Nursery and House Plants: Mix one part **Landscapers Advantage** with four parts soil.
- Tree and Shrub Mulching: Broadcast or mix one (1) pound of **Landscapers Advantage** for every square foot of bed.

### Safe for food crops!

Environmental Protection Agency regulation 503 permits usage of Exceptional Quality Class A Compost for crops intended for human consumption when used

**Landscapers Advantage** is produced at fully permitted and inspected state-of-the-art composting facilities, using modern quality control processes.
